MAWSON OUTDOOR

LOW SMOKE FIREPITS

www.masportheating.com.au

Mawson Outdoor Firepit Augmented Reality Experience.

Do you want to see what a Mawson outdoor firepit will look like in your space? You can find 3D models of the firepits by downloading the AR models on our website to your smartphone.

Step 1: Scan the QR code below or shown next to each product

This will bring you to our Augmented Reality portal.

Step 2: Select your firepit

Once on our AR portal, select the firepit which you desire to view in AR and click the "View in AR" button.

Please note:

iPhones and iPads with at least iOS 12.0 or newer are required for this function.

Android devices need to be ARCore supported devices and running Android 7.0 Nougat or newer.

Don't see the function on your phone? In that case, your device probably doesn't support augmented reality.

Step 3: Move your phone

Move your phone

Your phone will load the AR model and you will now see your room on the screen of your phone. Slowly move the phone from left to right. This way, you can scan the surface of your room.

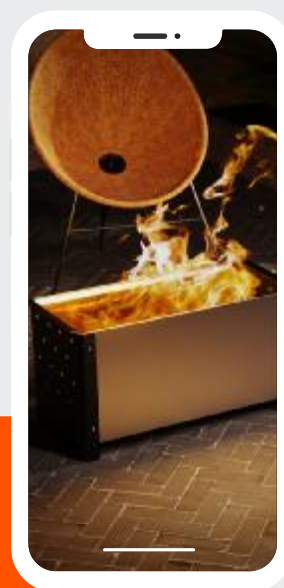

Step 4: Place the firepit

As soon as your room has been successfully scanned, use your finger to tap the place you want to put the product.

Step 5: Done!

You will now see the product in your room virtually. Walk around it and take a look at it from all angles.
